

In the greater Dallas/Ft.Worth area often the ONLY traffic information is available via XM-225. Yes, there are numerous radio stations that attempt to give a "token" traffic picture of the construction areas & some accident locations to avoid. That's just not good enough for so much "Metroplex" area to cover in 20 seconds or less !

With 20 to 30 plus accidents and construction zones on-going at any given time, only a few of the "hot spots" are mentioned on any of the local radio stations.

Because of the above facts, I urge you to reject the NAB's petition 04-160 and to support XM.

Thank you,  
Linda Soileau
